PROJECTS

A Bus Ticket Booking Application

- Built a Bus ticket booking java application.
- The application works on java, java libraries like webcam capture, and MySQL.
- The application has a real-time image capture function as well.

An Online Live Auction Web Application

- Built a Live Auction web application.
- The application works on web technology like HTML, CSS, JavaScript, and Ajax along with Java and Java libraries like Commons.io and MySQL.
- The application has a real-time live auction system where users can place live bids for an item and can also create new auctions.

A 2D Game Called “Shinobi No Mono”

- Built a 2D game using unity and C# for Windows OS.
- Worked on a complete storyline, scenes, and animation for the game.
- Also worked to combine different assets and materials for creating a wholesome environment.
